MNS

„your masternode resource and information  
platform“

## Our project

We are pleased to introduce the platform [mnodes.pro](https://mnodes.pro) to you. We are a platform where you can find all important information about MasterNodes and Coins. This will save you a lot of time in your search for your perfect investment. Our site is automatically updated daily, which means that you will always be up to date. This service is of course free of charge.

On our website you will find a clear overview of the most important information, such as the value and cost of a specific MasterNode. You can find out how many coins are needed to start a MasterNode, get information about the daily trading volume, market capitalization and much more. We want to offer you a wide range of products on our site.

It is worth mentioning that this project was started by two coin development teams. It is a joint venture between MasterWin and MillenniumCLub. With the experience of these two teams in MasterNodes, we want to provide our community with the most up-to-date information about every coin and masternode on our platform.

Of course, our team at [mnodes.pro](https://mnodes.pro) will be happy to answer all your questions about the platform and MasterNodes and Coins in general. You can contact us via our Discord channel (<https://discord.gg/8rbMBnc>).

The platform will be expanded and further developed in the coming months. For example, we are currently working on a mobile Android app. All listed masternodes and coins will be thoroughly checked by us in advance (information such as: Does the coin/masternode website work, does the Block Explorer work, is there a Github link, what does the reward structure look like, does the wallet work etc.).

For more information please visit our website <https://mnodes.pro/> and join our discord <https://discord.gg/8rbMBnc>.

"We look forward to seeing YOU there!

## Presale

Secure payment via CoinPayments.net:

<https://www.coinpayments.net/index.php>

CoinPayments was founded in 2013 and is a global payment portal for crypto currencies and digital assets. It was the world's first multi-coin payment processor and has been continuously developed since its launch 5 years ago. As of April 27, 2018, the company facilitates transactions in 435 currencies and has 938,000 providers in 223 geographic regions. In addition, online merchants and users can buy and sell goods and services through a cloud wallet solution. It is a privately held company led by its current CEO, Alex Alexandrov.

### Instructions for purchasing coins:

Please visit our site <https://mnodes.pro/home.php>

On the right side you will find the section [Buy MNS using BTC, LTC, DASH, and more].

In order to vote for a coin listed on our platform, you must purchase MNS coins. You can also buy 5000 MNS-Coins (Tier Level 1) to create your own MasterNode.

Select the appropriate amount in USD that you would like to buy. You will be directed to CoinPayments.net to complete the order. There you can then choose which crypto currencies you want to pay with.

Then select the amount you want to buy:

500 MNS [50\$ USD]

2500 MNS [250\$ USD]

5000 MNS [475\$ USD -5%]

12500 MNS [1125\$ USD -10%]

25000 MNS [2125\$ USD -15%]

50000 MNS [4000\$ USD -20%]

100000 MNS [7500\$ USD -25%]

## VOTE FOR YOUR FAVORITE COIN

If you have coins in the following list and want them to become part of the MNodeS.PRO platform, you can vote with MNS coins. When the minimum number of thousand votes is reached by any coin, we will add it to our platform.

Rank	Logo	Ticker / Coin	Total votes	Minimum Required	Coin Info	Action
1		MILL MillenniumClub	25	1000		<a href="#">VOTE</a>
2		BIR Birake	10	1000		<a href="#">VOTE</a>
3		DIVI Divi Project	0	1000		<a href="#">VOTE</a>
4		NRG Energi	0	1000		<a href="#">VOTE</a>

More coins will be listed if you fill out our listing form. Of course, you can also list your desired coin via the form to be able to vote for it afterwards.

## Benefits of MNS Coins

The goal is to become one of the largest coin information platforms in the world within the next few years. With special functions of our platform and the corresponding data acquisition, which we make available to you in compact form, we are laying the foundation for our project.

Through the voting system on our platform, new MNS coins are bought again and again. By creating a TiersNode the customer gets Rewards. By this procedure the price of MNS Coins should stabilize itself in the next years and be increased thereby. To achieve the goal of becoming a huge platform, a strong community is needed. In the next few years, special attention will be paid to building the community.

## TiersNode or Tiered Masternode

Tiered Masternode are an innovative multi-stage masternode concept, which can be found on only a few Masternode Coins. Some coins have 3 tiered masternodes, some have 4 tiered masternodes and some even have 5 tiered masternodes. Each level requires a different collateral amount and each brings a variety of revenues. Usually, lower levels are easily accessible to everyone, and higher levels require larger investments. The user can select any level to run a master node and receive rewards based on his level. Generally, a lower level offers lower rewards and higher levels offer very higher rewards. The chance to receive rewards in each level increases linearly with the number of coins. The more you invest, the higher your rewards.

## What is a Masternode?

A masternode is a server within a decentralized network. Therefore, it should be emphasized that a master node can perform the following tasks that a node (nodes) cannot perform, such as

- The processing of anonymous and confidential transactions
- Instant Transactions
- Monitor the network itself (example hypernodes)
- to have voting rights and to be able to exercise them

Masternodes are to bring more security and scalability to the network through additional functions. The high investment limit prevents monopolization and centralization, such as through pool mining.
